EDUCATION

Cornell University Aug 2025-May 2027

MS Design Technology, GPA: 4.0

Performance Apparel Design Lab—researching gait-tracking smart insoles (sensor integration, PCB design)

University of Texas at Austin Aug 2021-May 2025

BFA Design, minor in Computer Science, GPA: 3.9

Honors/Awards: Biodesign Challenge Finalist 2025, IDSA IDEA Finalist 2024, Distinguished College Scholar 2023-2025, TXI x Meta VR Hackathon Winner 2024, Fine Arts Honors Scholarship, Franks Endowed Scholarship, Texas Immersive Institute Alum

SKILLS

Programming: JavaScript, React, Node.js, Typescript, Socket.IO, HTML, CSS, Python, Git, TensorFlow, Web AR, Web APIs

Design: Figma, Photoshop, Illustrator, After Effects, Autodesk Maya, Rhino, Grasshopper, User Research, Data Visualization

EXPERIENCE

IBM, Data and AI Design Intern May 2026-Present

- Designed enterprise dashboard interfaces for IBM Planning Analytics during a visual language overhaul, restructuring information hierarchy and applying progressive disclosure to reduce cognitive load in financial analytics workflows
- Built a React/TypeScript tool for an AI-assisted brand ingestion and theming system that parses imported brand guidelines to extract design tokens (color, type) and generate cohesive dashboard themes and data visualizations

Texas A&M CIDI-Spatial Lab, Research Assistant Jan 2025-Aug 2025

- Developed a web-based GIS decision support tool (HTML, JavaScript, Django) for heat vulnerability analysis, translating a multi-criteria model into an interactive spatial weighting interface with real-time feedback
- Co-authored a peer-reviewed publication (Cartography and Geographic Information Science, CaGIS)

Kendra Scott, Design Intern Jun 2025-Aug 2025

- Built Microsoft Teams chatbot integrating Formlabs printer API for real-time printer monitoring and queue management, increasing utilization by ~20% and improving workflow communication between 10+ users
- Created production-ready 3D jewelry models in Rhino and ZBrush for a future retail collection

PROJECTS

Embodied Blocks, Systems Designer (Python, Claude API, Raspberry Pi) Spring 2026

2026 MIT Media Lab Hard Mode Hackathon Winner, Play Track

- Designed the interaction and system architecture for a modular AI-powered storytelling toy, mapping multimodal sensor inputs (camera, microphone, IMU) to LLM prompts that translate physical play into narrative feedback

Snoozier, Solo Designer + Developer (TensorFlow, JS, HTML/CSS) Summer 2024

Google Chrome Extension, interactive facial gesture-based productivity tracking

- Developed and published a Chrome Extension using Tensorflow.js Face Landmark Detection for facial gesture recognition and interaction; implemented custom UI and Chrome storage APIs

Elysian Heights, UX Lead + Creative Technologist (Figma, JS) Spring 2024

Immersive XR Experience, public ticketed show (Yugo BAFTA Longlist 2024)

- Directed and built interaction systems combining projection mapping, AR puzzles, and physical computing props
